

To whom this may concern: I am a long time listener of XM, and I'm writing in support of there ability to provide the kind of programming they promise to give from the moment of service. There has been many times that I have been unable to pick up radio signals, and thanks to XM, I have been able to listen to local news and weather broadcasts without interruption or having to go in search of a better station. To limit there broadcasting ability is wrong when we the customers pay for the service. Thats like telling the cable companies that they can no longer have news stations or information channels.

In closing, I ask for the rejection of the NAB's petition 04-160. Thank you for taking the time to read my comments on th matter.

Sincerely,

TerriSue Edwards
